

July 6, 2023

The Red River Authority of Texas is issuing a Boil Water Notice for the Howardwick public water system, due to valve repair work in the system. Staff will complete the repair, but it will take a couple of hours to restore water to the system. We apologize for the inconvenience of reduced pressure or loss of service.

Customers should boil their water prior to consumption such as drinking, washing hands or face, or brushing teeth.

You may experience intermittent water or pressure loss until the system is back to full operation.

You may access the Boil Water Notice on our website at rra.texas.gov on the quick links tab.
